5	61,3	60	97	1	B330	BEIGE			X	RETRO	VELUX TOTAL WIDTH = 62,8 ROOF
6	63,7	61,5	110,5	1	B339	WHITE	L			RETRO	

The order form for roller-blinds in cassettes must be filled in using the „**Diagram of window measurement taking for roller-blinds in cassettes** " and „**Diagram of roof window measurement taking for roller-blinds in cassettes - RETRO**".

Please remember to specify the type of the system you would like to assemble and to mark one appropriate of the three heights: **H, H1 or H2**.

**PCV „RETRO"** system is available in: white, beige and brown.

**„SIGMA" aluminium** is available in white and brown or with veneer: light oak, mahogany.

Please note that „**Sigma - C**" and „**Retro with spacing runners**" are spatial systems, which are typically used on the windows with non-standard glazing beads e.g. rounded glazing beads, or on the balcony windows with a door-rail.

**„Retro with spacing runners"** can be fitted outside the window pane outline, (in the same way as „**Sigma - C**"); if this is the case, please mark **BLIND'S TOTAL WIDTH** in the REMARKS column.

In the case of ordering the set of roller-blinds made from patterned fabrics (**E200, B300, B400, B700**), where one of the windows is the balcony window, in order to maintain the continuity of the pattern on the fabric, please use (\*\*) in the order form.

**If you have any doubts, please do not hesitate to call our company. We are always ready to answer all your questions.**
